|----------------|---|
| Applicability | This policy is applicable for all the projects, both New construction and Existing buildings under the purview of the BPTP. |
| Purpose | Disaster resilience is the ability of individuals, communities, organizations and states to adapt to and recover from hazards, shocks or stresses without compromising long-term prospects for development. |
| Aspects | <p>As a result of increase in number of natural and man-made disasters that have affected businesses and society, Companies must take part in how they respond to disasters and catastrophic events. BPTP recognises that such events can have a severe impact on its business and the community at large. At BPTP, we strive to adopt a proactive strategy to build resilience to catastrophe and disasters through following measures:</p> <ul style="list-style-type: none">• To reduce the effects of earthquakes on the building and its occupants, careful adherence to design of building structures as per standard norms is encouraged.• Adhering to the applicable fire safety related norms as per NBC guidelines• Undertaking analysis of the site water table/level, soil condition, topography before designing of the structure.• Designing based on the microclimate of the site.• Channelizing rainwater and wind flow to improve sustainability.• Ensuring flexibility in the interior layouts of the building for fulfilling fire exit requirements.• Aligning construction-phase practises with prescribed safety requirements• Ensuring that the emergency preparedness and response plan is in effect while the building is being built.• Protection of materials stored during acquisition from any disaster |
| Responsibility | All stakeholders including the statutory (technical), subject matter experts, business partners, contractors, clients, occupants and our own employees in our efforts to address resilience to disaster. |
| Amendments | This policy will stand automatically amended to the extent of any relevant change(s) in the applicable law and or for any change(s) in fact. |
