Applicability	This policy is applicable for all the projects, both New construction and Existing buildings under the purview of the BPTP.		
Purpose	Construction sector plays an important role in the economic sector of the country and are responsible for more than one-third of total energy uses and related GHG emissions in the society, leading to severe effects such as global warming and ozone depletion. The organization has designed to ensure minimum release of CO ₂ and other refrigerants to the atmosphere and thereby reducing stratospheric ozone depletion.		
Aspects	<p>CO₂ emissions in the construction sector can be direct or indirect emissions. Direct carbon emissions come from on-site construction activities like building, maintaining, or demolishing while Indirect carbon emissions originate from the provision of goods and services to construction operations. The main factors contributing majorly to Carbon Emission are energy consumption, on-site transportation, cement production, manufacturing of building materials followed by burning of fossil fuel and construction waste disposal. BPTP acknowledge that our entities have a significant impact on environment. At BPTP, we strive to adopt a proactive strategy to protect the environment by engaging in sustainable construction throughout life by adopting following measures:</p> <ol style="list-style-type: none"> 1. Outline strategies to avoid, reduce, mitigate and offset the project's direct emissions contributing towards the net zero by 2050; 2. Reduce energy use. 3. Thorough inspection of equipment for leaks. 4. 50% clean electricity utilization by 2030 for new construction 5. Propose their own timeframes and interim targets. 6. Periodic public reporting against their targets 7. Align with National targets and requirements. 		
Responsibility	All stakeholders, senior management, governing bodies, experts, business partners, contractors, clients, occupants and our own employees in our efforts to address greenhouse gas emission.		
Amendments	This policy will stand automatically amended to the extent of any relevant change(s) in the applicable law and or for any change(s) in fact.
