Applicability	This policy is applicable for all the projects, both New construction and Existing buildings under the purview of the BPTP.
Purpose	The construction and real estate sector consumes considerable amounts of materials. However, the purpose of policy is to ensure the sustainability of projects by sourcing & using eco-friendly material.
Aspects	<p>BPTP Group is a broad and complex. We recognises the importance of responsible sourcing of building materials which is in line with the environment, supply chain, principal contractor in the construction industry, and the three primary pillars of sustainable development: people, planet, and profits. The ethical sourcing also has financial advantages because they increase the company's reputation and uphold its corporate integrity, which helps to generate more profit. We acknowledge that our entities source various material for different projects which have a significant impact on environment. At BPTP, we strive to adopt a proactive strategy to protect the environment by engaging in sustainable construction throughout the lifecycle and aligns with our global corporate strategy for sustainability. The key objectives are:</p> <ul style="list-style-type: none">• Support traceability of raw materials by establishing robust processes and systems to ensure if the product meets safety standard.• Use EPD and HPD certified materials for the projects.• Commit to animal welfare, where applicable, and ensure that no wild animals are involved in the cultivation, harvest, or transformation of the raw materials provided to BPTP.• Ensure that natural raw materials and naturally derived ingredients are not linked to deforestation.• Ensure that rapidly renewable wood and wood certified by FSC to be used for all the wooden work.• Encourage construction and demolition waste products to be reused, recycled or refurbished.• Ensure that material should source from local vendors and green pro Ecolabel certified.• Encourage use of alternative materials that reduces cost and environmental impact.

	<ul style="list-style-type: none">• Encourage use of bio-based materials over conventional materials.• Encourage supply chain disclosures practices.• Commit to environmental targets and collaborate with disclosure platforms such as CDP (formerly Carbon Disclosure Project) to report on environmental impacts.
Implementation and Monitoring	All senior management level people, experts, business partners, advisors, contractors, clients, occupants and our employees to address responsible material sourcing.
Amendments	This policy will stand automatically amended to the extent of any relevant change(s) in the applicable law and or for any change(s) in fact.
