| Applicability | This policy is applicable for all the projects, both New construction and Existing buildings under the purview of the BPTP. |
| Purpose | The purpose of this policy is to meant to prevent or reduced pollution at construction site to protect human health and the environment. |
| Aspects | <p>Our approach to sustainable procurement is designed to help pursue best procurement practice in accordance with our group policy. BPTP Group acknowledge that construction have a significant impact on environment and contribute to by adopting following objectives:</p> <ul style="list-style-type: none">• The exhaust emissions of construction machinery and vehicles entering and leaving the site must meet the national annual inspection requirements• It is forbidden to burn inferior wood materials on-site and use coal in the domestic fuel• Close and tight measures should be adopted for transportation to avoid material scattering, flying, and leakage• Construction material at the site and on the vehicles that carry them should be properly covered.• Keeping the ground at construction sites wet to let the dust settle and inhibit it from spreading.• Setting barriers around construction site and covering mounds of sand with dust barrier sheets• Methods such as vibration isolation, sound insulation, and noise reduction are adopted to minimize or avoid construction vibration and noise pollution.• Electric welding operations should shield the welding arc light, and take measures to block the light at night.• For different types of wastewater, different treatment facilities should be adopted, including septic tanks, grease traps, and sedimentation tanks, and different treatment methods should be adopted, including oil removal, sediment removal, acid-base neutralization, and sedimentation filtration. |

| | |
|-------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | <ul style="list-style-type: none">• The storage of toxic and harmful oils and other chemicals should be strictly set up with a water barrier.• Recycling and reuse rate of construction waste generated from demolition is intended not to be higher than 10%.• With airtight garbage containers set up, the garbage in the living area of the construction site is bagged and removed in time |
| Implementation and Monitoring | All the members of Board of Directors, CEO, experts, business partners, contractors, clients, occupants and our own employees in our efforts to address sustainable procurement. |
| Amendments | This policy will stand automatically amended to the extent of any relevant change(s) in the applicable law and or for any change(s) in fact. |
